All Rights Reserved.

The information in this document is subject to change without prior notice in order to improve the reliability, design and function. It does not represent a commitment on the part of the manufacturer.

Under no circumstances will the manufacturer be liable for any direct, indirect, special, incidental, or consequential damages arising from the use or inability to use the product or documentation, even if advised of the possibility of such damages.

This document contains proprietary information protected by copyright. All rights are reserved. No part of this manual may be reproduced by any mechanical, electronic, or other means in any form without prior written permission of the manufacturer.

Declaration of Conformity

CE

The CE symbol on your product indicates that it is in compliance with the directives of the Union European (EU). A Certificate of Compliance is available by contacting Technical Support.

This product has passed the CE test for environmental specifications when shielded cables are used for external wiring. We recommend the use of shielded cables. This kind of cable is available from ARBOR. Please contact your local supplier for ordering information.

This product has passed the CE test for environmental specifications. Test conditions for passing included the equipment being operated within an industrial enclosure. In order to protect the product from being damaged by ESD (Electrostatic Discharge) and EMI leakage, we strongly recommend the use of CE-compliant industrial enclosure products.

Warning

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

FCC Class B

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1)This device may not cause harmful interference, and
- (2)This device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

RoHS

ARBOR Technology Corp. certifies that all components in its products are in compliance and conform to the European Union's Restriction of Use of Hazardous Substances in Electrical and Electronic Equipment (RoHS) Directive 2002/95/EC.

The above mentioned directive was published on 2/13/2003. The main purpose of the directive is to prohibit the use of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE) in electrical and electronic products. Member states of the EU are to enforce by 7/1/2006.

ARBOR Technology Corp. hereby states that the listed products do not contain unintentional additions of lead, mercury, hex chrome, PBB or PBDB that exceed a maximum concentration value of 0.1% by weight or for cadmium exceed 0.01% by weight, per homogenous material. Homogenous material is defined as a substance or mixture of substances with uniform composition (such as solders, resins, plating, etc.). Lead-free solder is used for all terminations (Sn(96-96.5%), Ag(3.0-3.5%) and Cu(0.5%)).

SVHC / REACH

To minimize the environmental impact and take more responsibility to the earth we live, Arbor hereby confirms all products comply with the restriction of SVHC (Substances of Very High Concern) in (EC) 1907/2006 (REACH --Registration, Evaluation, Authorization, and Restriction of Chemicals) regulated by the European Union.

All substances listed in SVHC < 0.1 % by weight (1000 ppm)

Warning

Single Board Computers and their components contain very delicate Integrated Circuits (IC). To protect the Single Board Computer and its components against damage from static electricity, you should always follow the following precautions when handling it :

1. Disconnect your Single Board Computer from the power source when you want to work on the inside.
2. Hold the board by the edges and try not to touch the IC chips, leads or circuitry.
3. Use a grounded wrist strap when handling computer components.
4. Place components on a grounded antistatic pad or on the bag that comes with the Single Board Computer, whenever components are separated from the system.

Replacing the Lithium Battery

Incorrect replacement of the lithium battery may lead to a risk of explosion.

The lithium battery must be replaced with an identical battery or a battery type recommended by the manufacturer.

Do not throw lithium batteries into the trash-can. It must be disposed of in accordance with local regulations concerning special waste.

Technical Support

If you have any technical difficulties, please contact our website at:

<https://www.arbor-technology.com>

Warranty

This product is warranted to be in good working order for a period of two years from the date of purchase. Should this product fail to be in good working order at any time during this period, we will, at our option, replace or repair it at no additional charge except as set forth in the following terms. This warranty does not apply to products damaged by misuse, modifications, accident or disaster.

Vendor assumes no liability for any damages, lost profits, lost savings or any other incidental or consequential damage resulting from the use, misuse of, or inability to use this product. Vendor will not be liable for any claim made by any other related party.

Vendors disclaim all other warranties, either expressed or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the hardware, the accompanying product's manual(s) and written materials, and any accompanying hardware. This limited warranty gives you specific legal rights.

Return authorization must be obtained from the vendor before returned merchandise will be accepted. Authorization can be obtained by calling or faxing the vendor and requesting a Return Merchandise Authorization (RMA) number. Returned goods should always be accompanied by a clear problem description.

Chapter 1

Introduction

1.1 The Product

The EmETXe-i90M3 is a space-conscious CPU board of 125 mm x 95 mm to take up only small footprint in your system. By the architecture of Type 6, the board has two high-performance connectors to promise stable data passing rate. The soldered onboard 7th Generation Intel® Core™ processor, along with integrated Intel® Graphics chipset, bring LVDS, and DDI solution for most monitors or LCD video panels.

For system configuration, the board is supported by AMI UEFI BIOS. EmETXe-i90M3 is an ideal choice for some demanding industrial control and data communications by its significant processing performance, low power consumption and these features:

- Soldered onboard 7th Generation Intel® Core™ i7-7820EQ/i5-7442EQ/Xeon E3-1505L v6
- Intel I219LM PCIe GbE PHY w/ iAMT
- Dual Channels 24-bit LVDS and 2 x DDI ports, Analog RGB
- Support 2 independent displays
- 8.5V~20V Wide Range Voltage Input
- Wide Range Operating Temp.: -40 ~ 85°C

1.2 About This Manual

This user's manual provides general information and installation instructions about the product. This user's manual is intended for experienced users and integrators with hardware knowledge of personal computers. If you are not sure about any description in this booklet. Please consult your vendor before further handling.

1.3 Specifications

System	
CPU	Soldered onboard 7 th Generation Intel® Core™ i7-7820EQ 2.8GHz/i5-7442EQ 2.7GHz/Xeon E3-1505L v6 3.0GHz
Chipset	Intel QM175 PCH/CM238
Memory	2 x DDR4 SO-DIMM sockets
BIOS	AMI UEFI BIOS
Watchdog Timer	1~255 levels reset
I/O	
USB Port	12 x USB ports: - 8 x USB 2.0 ports - 4 x USB 3.0 ports
Serial Port	2 x UART ports (RX/TX only)
Expansion Bus	8 x PCIe x1 lanes, 1 x PCIe x16 lane, I2C Interface, GPIO
Storage	4 x Serial ATA ports with 600MB/s HDD transfer rate
Ethernet Chipset	1 x Intel® i219LM PCIe GbE PHY w/ iAMT
Audio	HD audio link
TPM	Supports TPM (OEM Request)
Display	
Graphic Chipset	Integrated Intel® HD Graphics 630/P630
Graphic Interface	LCD: Dual Channels 24-bit LVDS
	Analog RGB
	2 x DDI ports
OS support	
Windows 10 64-bit	
Linux: Ubuntu	
Mechanical & Environmental	

Power Requirement	8.5V~20V +/- 5% wide range voltage input, +5VSB
Power Consumption	4.31A@12V(i7-7820EQ Typical)
Operating Temp.	-40 ~ 85°C (-40 ~ 185°F)
Operating Humidity	10 ~ 95% @ 85°C (non-condensing)
Dimensions (L x W)	125 x 95 mm (4.9" x 3.7")

1.4 Inside the Package

Before you begin installing your single board, please make sure that the following materials have been shipped:

1 x EmETXe-i90M3 COM Express CPU Module

1 x Quick Installation Guide

If any of the above items is damaged or missing, contact your vendor immediately.

1.5 Ordering Information

EmETXe-i90M3-WT-7820EQ	WT COMe Type 6 Basic CPU Module,Kabylake-H, i7-7820EQ,w/VGA, -40 ~ 85°C
EmETXe-i90M3-WT-7442EQ	WT COMe Type 6 Basic CPU Module,Kabylake-H, i5-7442EQ,w/VGA,-40 ~ 85°C
EmETXe-i90M3-WT-1505LV6	WT COMe Type 6 Basic CPU Module,Kabylake-H, Xeon, E3-1505L v6,w/VGA,-40 ~ 85°C

1.5.1 Optional Accessories

HS-90M0-C1	Heat sink with Fan (125x95x35mm)
PBE-1705-F1	COM Express® Type 6 evaluation carrier board with SIO F71869ED module in ATX form factor
CBK-03-1705-00	Cable kit 1 x SATA cable 2 x COM Flat cables

1.6 Driver(6.8A) Installation

The CPU module supports Windows 10. To install the drivers, please go to our website at www.arbor-technology.com and download the driver pack from the product page. If you need driver DVD, please contact your ARBOR sales representative.

Windows 10 64-bit

Chapter 2

Board Overview

2.1 What Is “COM Express®”?

With more and more demands on small and embedded industrial boards, a multi-functional COM (Computer-on-Module) surfaces as a great solution.

COM Express® supports seven pin-out types applying to Basic and Extended form factors:

Module Type 1 and 10 support single connector with two rows (220 pins).

Module Type 2, 3, 4, 5 and 6 support two connectors with four rows (440 pins). EmETXe-i90M3 is a Type-6 module.

Difference between Standard Type 6 and EmETXe-i90M3 is listed as below:

Module Type	Standard Type 6	EmETXe-i90M3
Connectors	2	2
Connector Rows	A, B, C, D	A, B, C, D
PCIe Lanes (Max)	24	24
LAN (Max)	1	1
Serial Ports (Max)	2	2
Digital Display I/F (Max)	3	3
USB 3.0 Ports (Max)	4	4

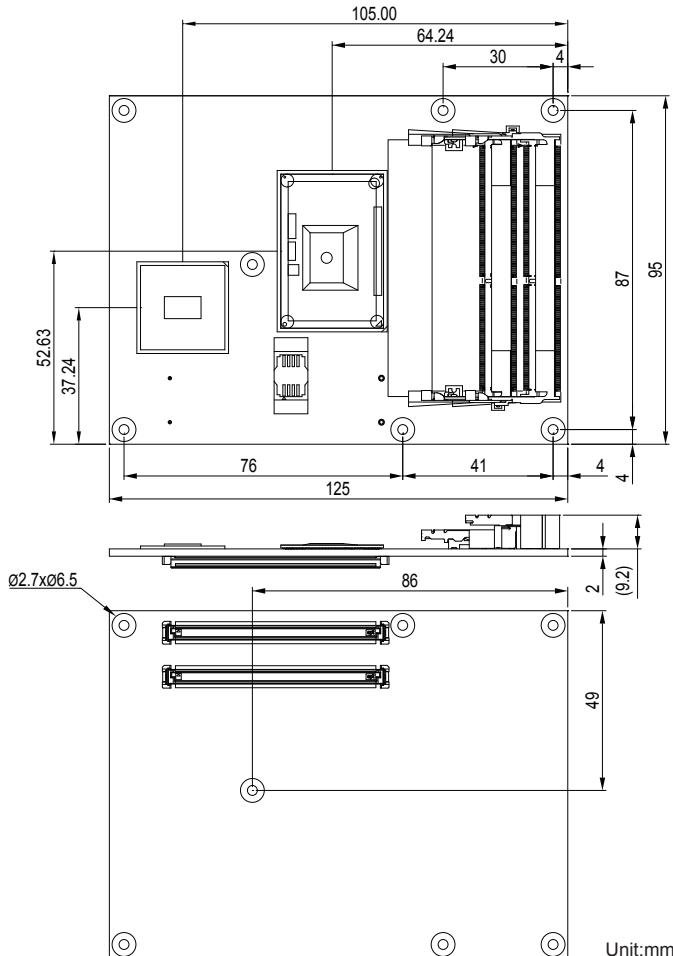

Row AB provides pins for PCI Express, SATA, LVDS, LCD channel, LPC bus, system and power management, VGA, LAN, and power and ground interfaces.

Row CD provides SDVO and legacy PCI signals next to additional PCI Express, LAN and power and ground signals. The COM are targeted at following applications:

- Retail & Advertising
- Medical
- Test & Measurement
- Gaming & Entertainment
- Industrial & Automation
- Military & Government
- Security

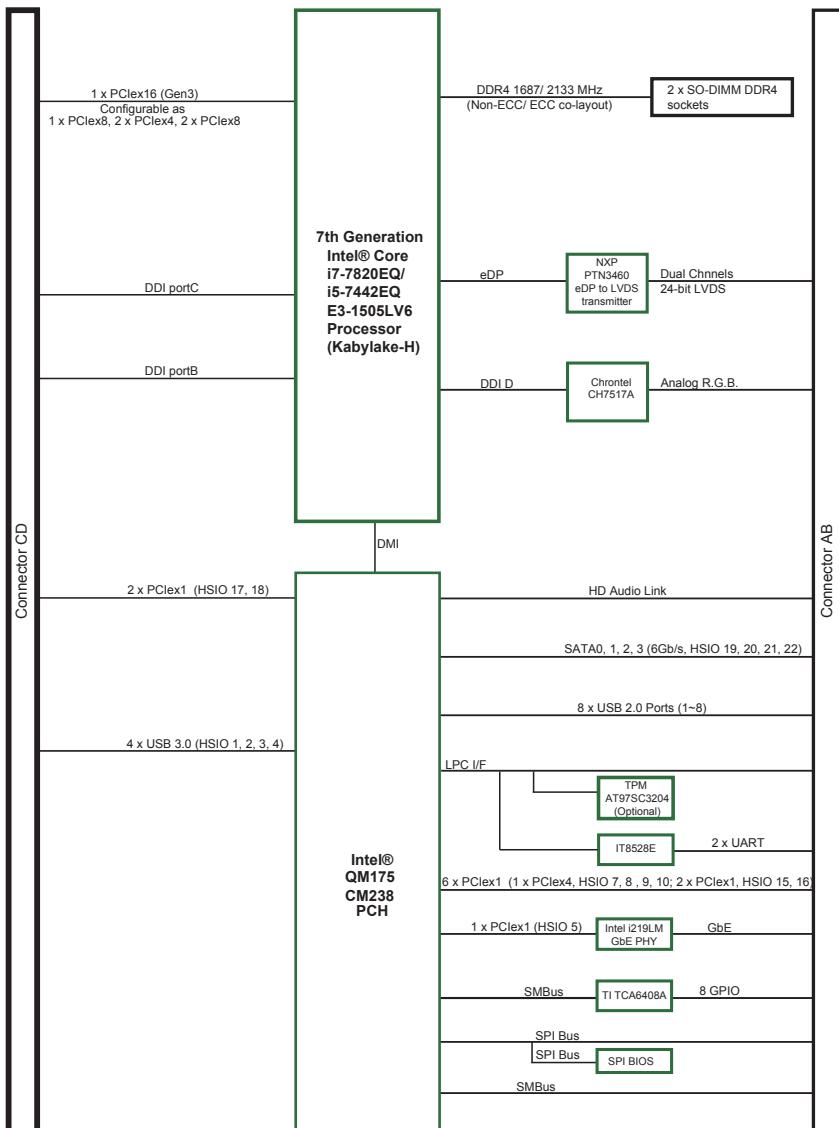

2.2 Board Dimensions

The following illustration shows the dimension of EmETXe-i90M3, with the measurements in width, depth, and height called out.

Unit:mm

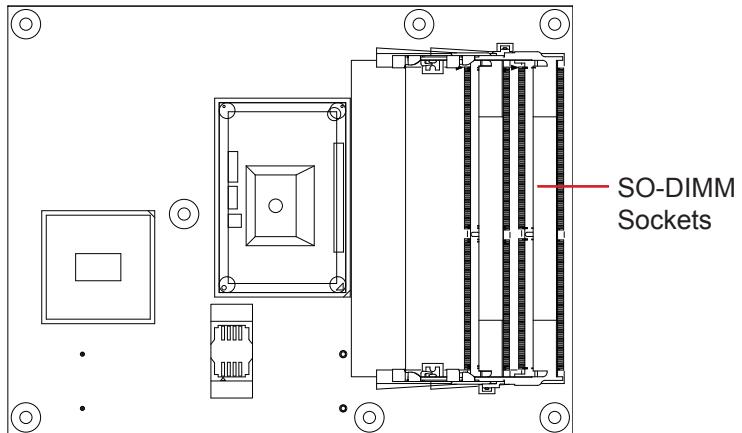

2.3 Block Diagram

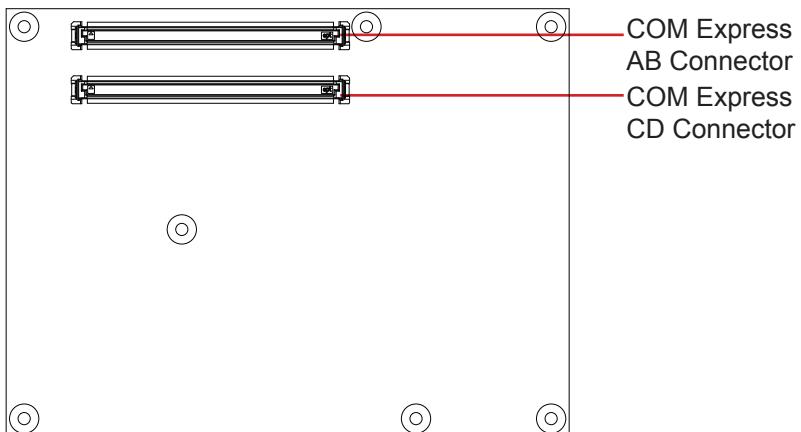

2.4 Connector Pin Definition

Being a most commonly-used Type 6, the EmETXe-i90M3 features two board-to-board connectors on bottom side.

Chapter 3

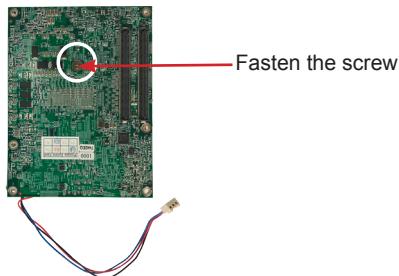

Installation & Maintenance

3.1 Installing the CPU Module to Carrier Board

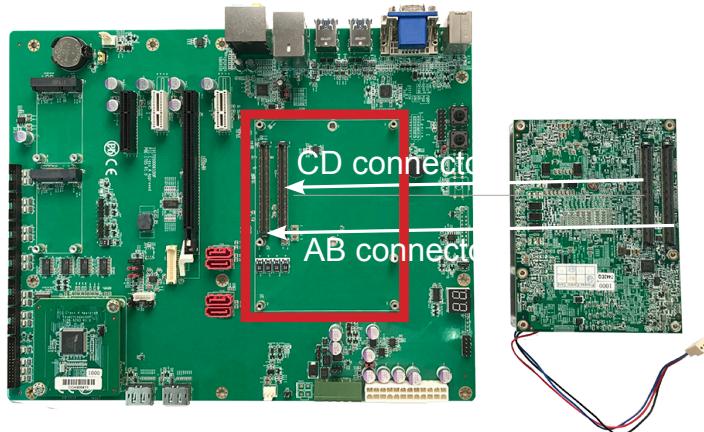

1. Find the heat sink included in optional accessories. (See section [1.5.1 Optional Accessories on page 5](#)) Apply thermal grease to be in contact with CPU and chipset on CPU module.

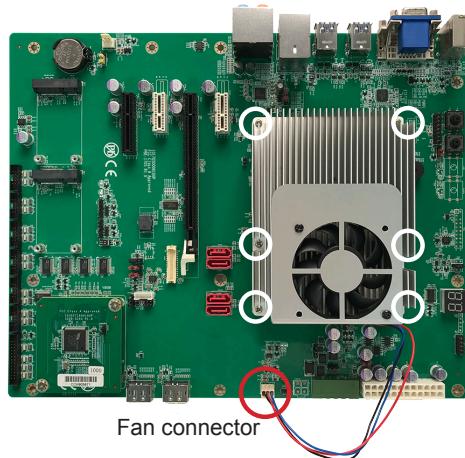

2. Place the heat sink over the CPU module and fasten the screw to secure it in place.

3. Find the COM Express connectors on carrier board PBE-1705, which is available in Section [1.5.1 Optional Accessories on page 5](#).
4. Mount the EmETXe-i90M3 into PBE-1705 via COM Express connectors as below; that is, COM Express AB to AB and CD to CD.

5. Secure the CPU module to the carrier board by fastening the 6 screws included in the heat sink accessory pack. Then plug the fan cable to the fan connector on the carrier board.

This page is intentionally left blank.

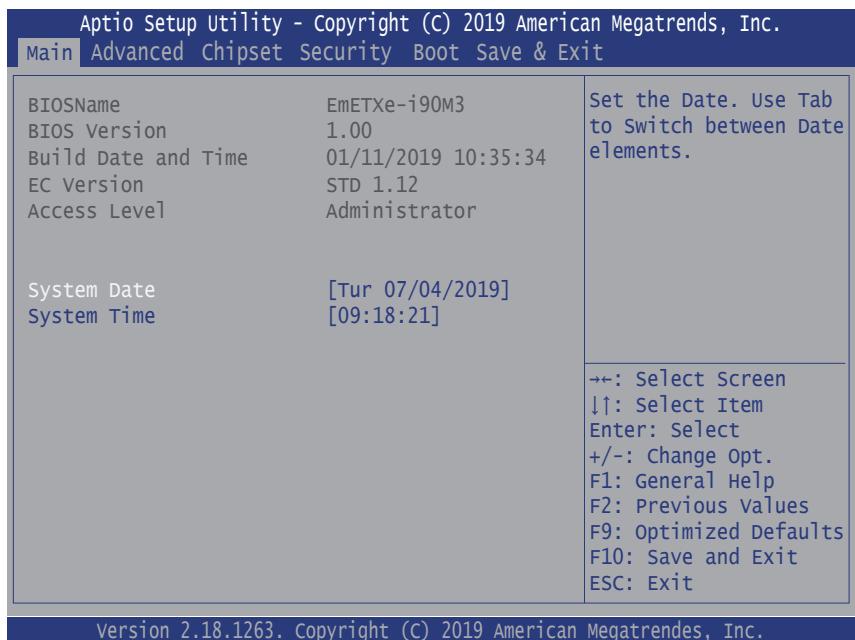

Chapter 4

BIOS

4.1 Main

The AMI BIOS provides a Setup utility program for specifying the system configurations and settings. The BIOS RAM of the system stores the Setup utility and configurations. When you turn on the computer, the AMI BIOS is immediately activated. To enter the BIOS SETUP UTILITY, press “**Delete**” once the power is turned on.

The **Main Setup** screen lists the following information:

Setting	Description
System Language	Choose the system default language.
System Date	<p>Set the system date. Use Tab to switch between Data elements. Note that the ‘Day’ automatically changes when you set the date.</p> <ul style="list-style-type: none"> ▶ The date format is: <ul style="list-style-type: none"> Day: Sun to Sat Month: 1 to 12 Date: 1 to 31 Year: 1998 to 2099

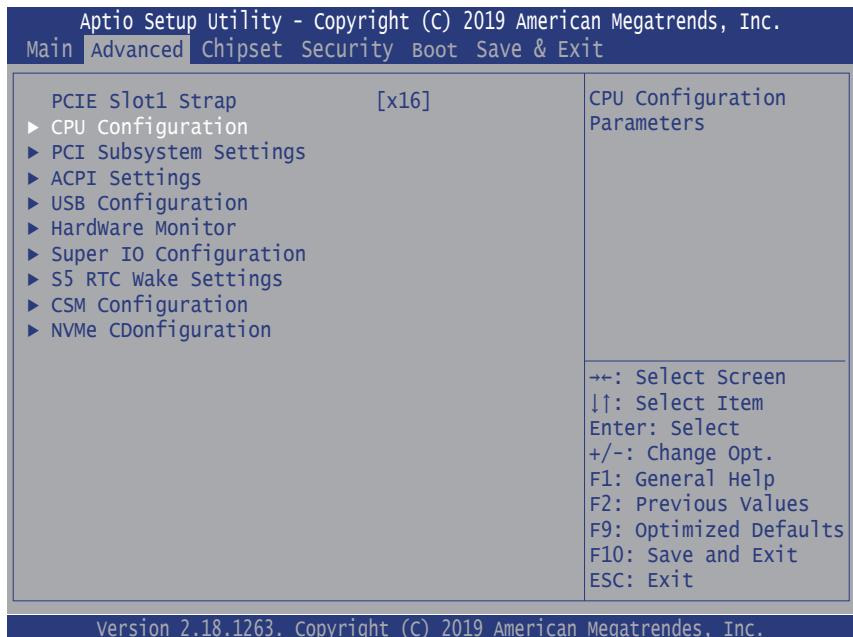

System Time	Set the system time. Use Tab to switch between Time elements. ► The time format is: Hour: 00 to 23 Minute: 00 to 59 Second: 00 to 59
-------------	---

Key Commands

BIOS Setup Utility is mainly a key-based navigation interface. Please refer to the following key command instructions for navigation process.

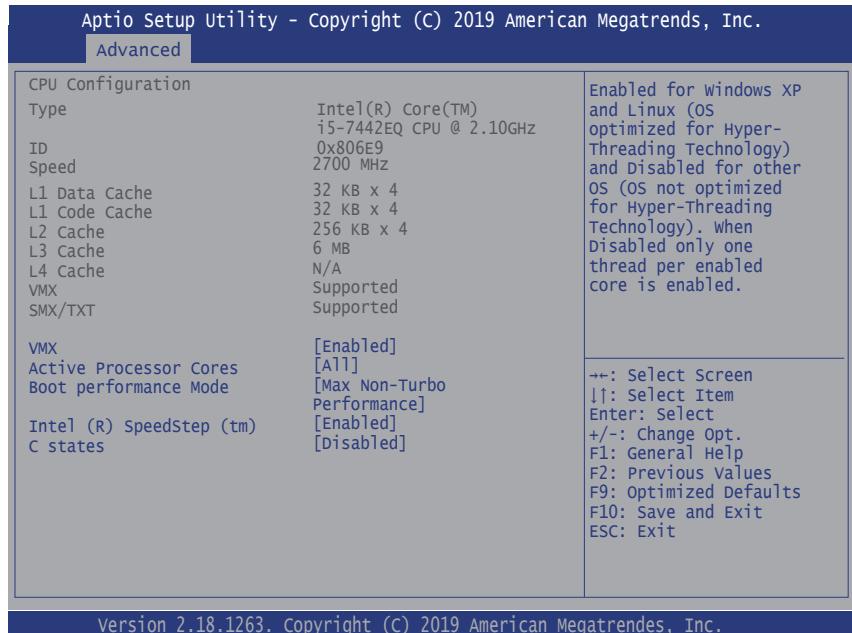

Keystroke	Function
◀ ▶	Move to highlight a particular configuration screen from the top menu bar / Move to highlight items on the screen
▼ ▲	Move to highlight previous/next item
Enter	Select and access a setup item/field
Esc	On the Main Menu – Quit the setup and not save changes into CMOS (a message screen will display and ask you to select “OK” or “Cancel” for exiting and discarding changes. Use “←” and “→” to select and press “Enter” to confirm) On the Sub Menu – Exit current page and return to main menu
Page Up / +	Increase the numeric value on a selected setup item / make change
Page Down / -	Decrease the numeric value on a selected setup item / make change
F1	Activate “General Help” screen
F2	Load previous values
F9	Load optimized defaults
F10	Save the changes that have been made in the setup and exit. (a message screen will display and ask you to select “OK” or “Cancel” for exiting and saving changes. Use “←” and “→” to select and press “Enter” to confirm)

4.2 Advanced

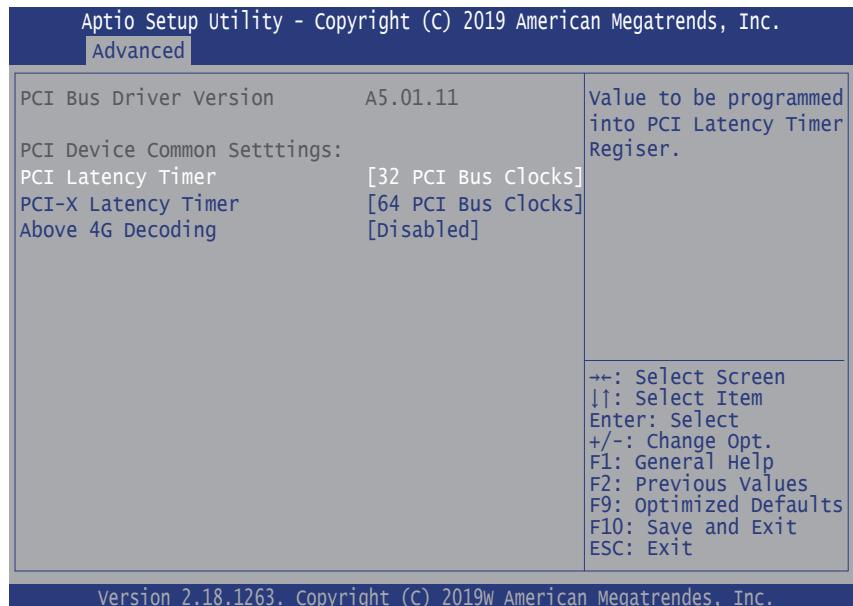

Setting	Description
PCIE Slot1 Strap	Select PCIE Slot1 strap. Options: x16 (default) and x8x8
CPU Configuration	See section 4.2.1 CPU Configuration on page 23
PCI Subsystem Settings	See section 4.2.2 PCI Subsystem Settings on page 24
ACPI Settings	See section 4.2.3 ACPI Settings on page 25
USB Configuration	See section 4.2.4 USB Configuration on page 26
Hardware Monitor	See section 4.2.5 Hardware Monitor on page 28
Super IO Configuration	See section 4.2.6 Super IO Configuration on page 29
S5 RTC Wake Settings	See section 4.2.7 S5 RTC Wake Settings on page 31
CSM Configuration	See section 4.2.8 CSM Configuration on page 32
NVMe Configuration	See section 4.2.9 NVMe Configuration on page 33

4.2.1 CPU Configuration

Setting	Description
VMX	Enable or disable Intel virtualization technology. ▶ Options: Enabled (default) or Disabled
Active Processor Cores	Number of cores to enable in each processor package. ▶ Options: All (default) 1, 2 and 3
Boot performance Mode	Set the performance state that the BIOS will set before the OS handoff. ▶ Options: Max Non-Turbo Performance (default), Max Power Saving and Turbo Performance
Intel (R) Speed Step (tm)	Enable (default)/ Disable Intel SpeedStep. Allows more than two frequency ranges to be supported.
C States	Enable /Disable (default) CPU C States

4.2.2 PCI Subsystem Settings

Setting	Description
PCI Latency Timer	Value to be programmed into PCI Latency timer Register. ► Default: 32 PCI Bus Clocks
PCI-X Latency Timer	Value to be programmed into PCI Latency timer Register. ► Default: 64 PCI Bus Clocks
Above 4G Decoding	Enable/Disable (default) 64bit capable Devices to be Decoded in Above 4G Address Space (Only if System Supports 64 bit PCI Decoding).

4.2.3 ACPI Settings

Aptio Setup Utility - Copyright (c) 2019 American Megatrends, Inc.

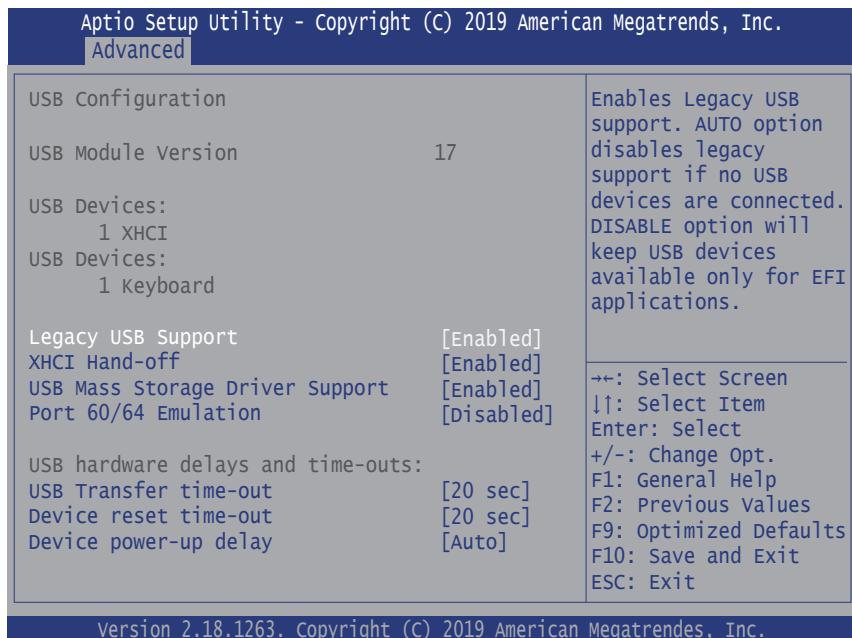

Advanced

ACPI Settings		Enables or Disables System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
Enable Hibernation	[Enabled]	→←: Select Screen ↑↓: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit
ACPI Sleep State	[S3 (Suspend to RAM)]	

Version 2.18.1263. Copyright (c) 2019 American Megatrendes, Inc.

Setting	Description
Enable Hibernation	Enable (default) or Disable System ability to Hibernate (OS/S4 Sleep State). This option may be not effective with some OS.
ACPI Sleep State	Select the highest ACPI sleep state the system will enter when the SUSPEND button is pressed. ▶ Options: Suspend Disabled and S3 (Suspend to RAM) (default).

4.2.4 USB Configuration

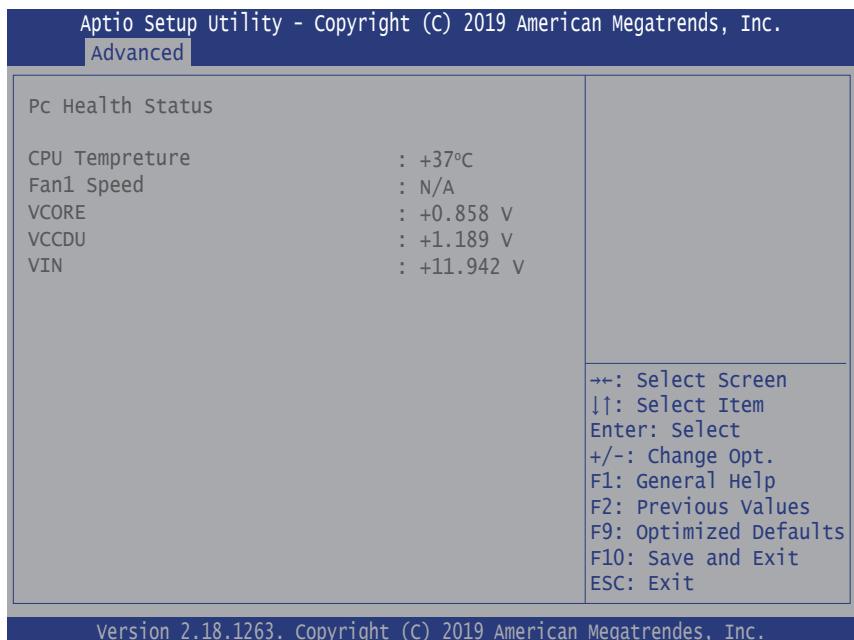

Version 2.18.1263. Copyright (C) 2019 American Megatrends, Inc.

Setting	Description
Legacy USB Support	Sets legacy USB support. ▶ Options: Enabled (default), Disabled and Auto . AUTO option disables legacy support if no USB devices are connected. Disable option will keep USB devices available only for EFI applications.
XHCI Hand-off	Enable (default) or Disable XHCI Hand-off This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.
USB Mass Storage Driver Support	Enable (default) or Disable USB Mass Storage Driver Support.

Port 60/64 Emulation	Enables/Disables (default) I/O port 60h/64h emulation support. This should be enabled for the complete USB keyboard legacy support. USB keyboard legacy support for non-USB aware OSes. ▶ Options: Enabled and Disabled (default).
USB hardware delay and time-out	
USB Transfer time-out	Use this item to set the time-out value for control, bulk, and interrupt transfers. ▶ Options available are: 1 sec , 5 sec , 10 sec , 20 sec (default)
Device reset time-out	Use this item to set USB mass storage device start unit command time-out. ▶ Options available are: 10 sec , 20 sec (default), 30 sec , 40 sec
Device power-up delay	Use this item to set maximum time the device will take before it properly reports itself to the host controller. ▶ Options available are: Auto (Default): 'Auto' uses default value: for a root port it is 100 ms, for a hub port the delay is taken from hub descriptor. Manual : Select Manual you can set value for the following sub-item: ' Device Power-up delay in seconds ', the delay range in from 1 to 40 seconds, in one second increments.

4.2.5 Hardware Monitor

Access this submenu to monitor the hardware status.

4.2.6 Super IO Configuration

Aptio Setup Utility - Copyright (C) 2019 American Megatrends, Inc.

Advanced

Super IO Configuration		Set Parameters of Serial Port 1 (CON1)
Super IO Chip	IT8528	
▶ Serial Port 1 Configuration		
▶ Serial Port 2 Configuration		
Super IO Chip	F71869A	
▶ Serial Port 3 Configuration		
▶ Serial Port 4 Configuration		
▶ Parallel Port Configuration		
Restore AC Power Loss	[Power off]	→: Select Screen ↑: Select Item Enter: Select +/-: Change Opt. F1: General Help F2: Previous Values F9: Optimized Defaults F10: Save and Exit ESC: Exit

Version 2.18.1263. Copyright (c) 2019 American Megatrends, Inc.

Setting	Description
Serial Port 1/2/3/4 & Parallel Port Configuration	See next page.
Restore AC Power Loss	Specify what state to go to when power is re-applied after a power failure. ▶ Options: Last State , Power On and Power Off (default)

Serial Port 1/2/3/4 Configuration

Setting	Description
Serial Port	<p>Enable (default) or Disable Serial Port (COM).</p>
Change Settings	<p>Select an optimal setting for Super IO device.</p> <ul style="list-style-type: none"> ▶ Options for Serial Port 1: Auto IO=3F8h; IRQ=4 (default) ; IO=3F8h; IRQ=3, 4, 7, 12; IO=2F8h; IRQ=3, 4, 7, 12; ▶ Options for Serial Port 2: Auto IO=2F8h; IRQ=3 (default) IO=3F8h; IRQ=3, 4, 7, 12 IO=2F8h; IRQ=3, 4, 7, 12 ▶ Options for Serial Port 3: Auto IO=3E8h; IRQ=11 (default) IO=3E8h; IRQ=7, 10, 11, 12 IO=2E8h; IRQ=7, 10, 11, 12 IO=2F0h; IRQ=7, 10, 11, 12 IO=2E0h; IRQ=7, 10, 11, 12 ▶ Options for Serial Port 4: Auto IO=2E8h; IRQ=10 (default) IO=3E8h; IRQ=7, 10, 11, 12 IO=2E8h; IRQ=7, 10, 11, 12 IO=2F0h; IRQ=7, 10, 11, 12 IO=2E0h; IRQ=7, 10, 11, 12

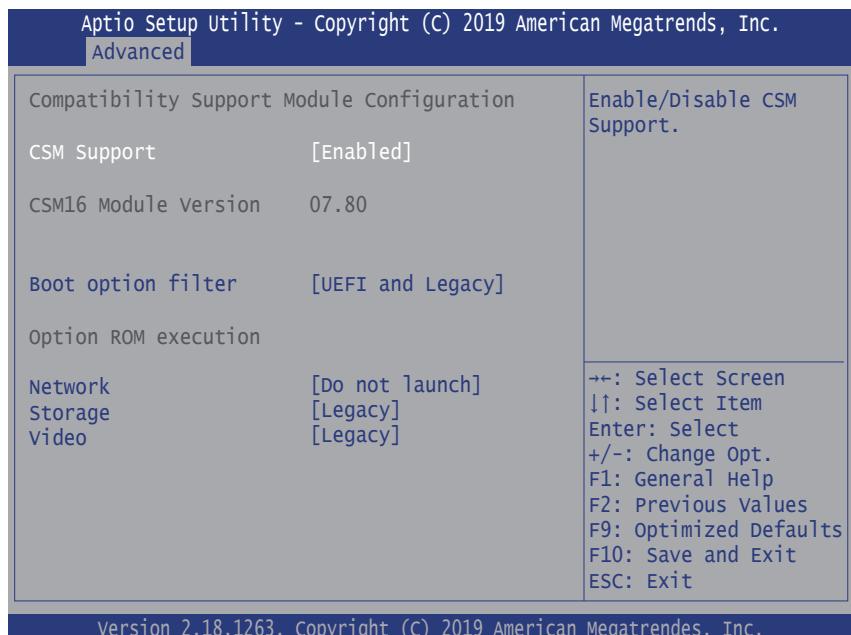

Parallel Port Configuration

Setting	Description
Parallel Port	Enable (default) or Disable Parallel Port (LPT/LPTE).
Change Settings	Select an optimal setting for Super IO device. <ul style="list-style-type: none"> ▶ Options: Auto IO=378h; IRQ=7 (default) IO=378h; IRQ=7, 10, 11, 12 IO=278h; IRQ=7, 10, 11, 12 IO=3BCh; IRQ=7, 10, 11, 12
Device Mode (only for Parallel Port Configuration)	Change the Printer Port mode. <ul style="list-style-type: none"> ▶ Options: STD Printer Mode (default) SPP Mode EPP-1.9 and SPP Mode EPP-1.7 and SPP Mode ECP Mode ECP and EPP 1.9 Mode ECP and EPP 1.7 Mode.

4.2.7 S5 RTC Wake Settings

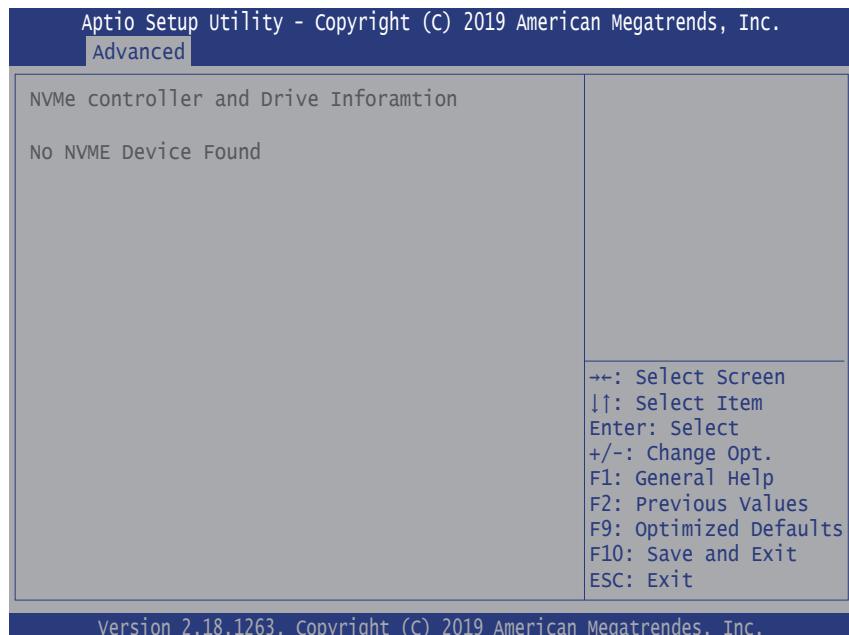

Setting	Description
Wake System from S5	Enable or Disable (default) system wake on alarm event. <ul style="list-style-type: none"> ▶ Options available are: Disabled (default): Fixed Time: System will wake on the hr::min::sec specified. DynamicTime: If selected, you need to set Wake up minute increase from 1 - 5. System will wake on the current time + increase minute(s).

4.2.8 CSM Configuration

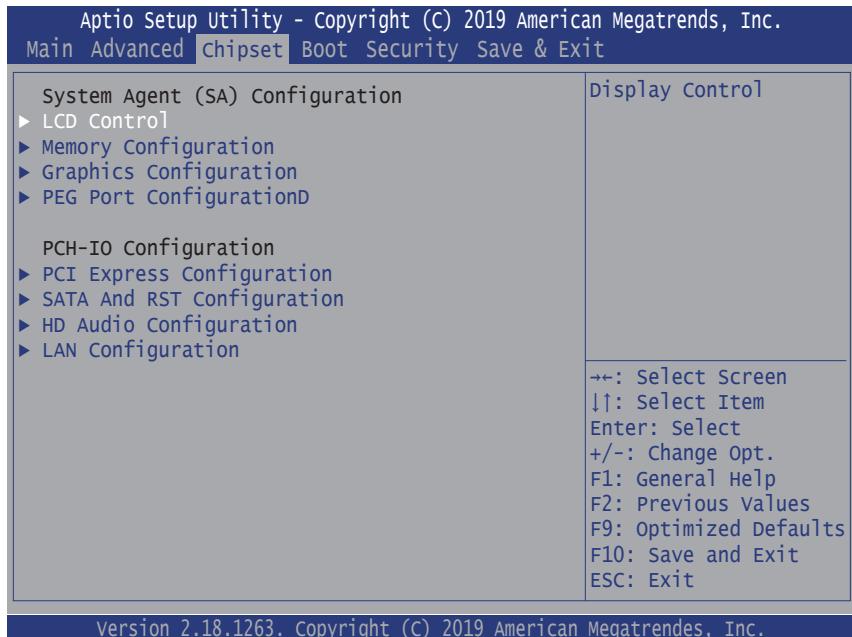

Setting	Description
CSM Support	Enable (default) or Disable CSM Support.
Boot option filter	Control the Legacy/UEFI ROMs priority. ▶ Options: UEFI and Legacy (default), Legacy only and UEFI only
Network	Control the execution of UEFI and Legacy PXE OpROM ▶ Options: Do not lauch (default) and Legacy
Storage	Control the execution of UEFI and Legacy Storage OpROM ▶ Options: Do not lauch and Legacy (default)
Video	Control the execution of UEFI and Legacy Video OpROM ▶ Options: Do not lauch and Legacy (default)

4.2.9 NVMe Configuration

Access this submenu to view the NVMe controller and driver information.

4.3 Chipset

Setting	Description
System Agent (SA) Configuration	
LCD Control	
Boot Display	<p>Select the Video Device which will be activated during POST. This has no effect if external graphics present. Secondary boot display selection will appear based on your selection. VGA modes will be supported only on primary display.</p> <ul style="list-style-type: none"> ▶ Options: VBIOS Default (default), CRT, LVDS, DVI and DP1.
Active LFP	<p>Configuring LFP usage</p> <ul style="list-style-type: none"> ▶ Options: No eDP (default), and eDP Port-A
Memory Configuration	Access this submenu to view the memory configuration.

Graphic Configuration	See section 4.3.1 Graphics Configuration on page 36
PEG Port Configuration	
Enable Root Port	Enable or Disable (default) the Root Port. ▶ Options: Auto (default), Disabled and Enabled .
Max Link Speed	Configures PEG 0:1: 0 Max Speed. ▶ Options: Auto (default), Gen 1 , Gen 2 and Gen 3 .
PCIe Spread Spectrum Clocking	Allows to Enable (default) or Disable Spread Spectrum Clocking for compliance testing.
PCI-IO Configuration	
PCI Express Configuration	See section 4.3.2 PCI Express Configuration on page 37
SATA And RST Configuration	See section 4.3.3 SATA and RST Configuration on page 37
HD Audio Configuration	Control Detection of the HD-Audio device. ▶ Options: Disabled : HDA will be unconditionally disabled Enabled : HDA will be unconditionally Enabled Auto (default) = HDA will be enabled if present, disabled otherwise.
LAN Configuration	
PHC LAN Controller	Enables/Disables onboard NIC. ▶ Options: Enabled (default) and Disabled
Wake on LAN Enable	Available if PCH LAN Controller is enabled: ▶ Options: Enable (default) / Disable integrated LAN to wake the system.

4.3.1 Graphics Configuration

Setting	Description
Skip Scanning of External Gfx Card	If enabled, it will not scan for External Gfx Card on PEG and PCH PCIE Ports. ► Options: Disabled (default) and Enabled .
External Gfx Card Primary Display Configuration	
Primary PEG	Select which of IGFX/PEG/PCI graphics device should be Primary Display or select SG for Switchable Gfx. ► Options: Auto (default), PEG11 and PEG12 .
Primary PCIE	Select the card used on the platform ► Options: Auto (default) and PCIE1~18 .
Internal Graphics	Keep IGFX enabled based on the setup options. ► Options: Auto (default), Disabled and Enabled
GTT Size	Select the GTT Size. ► Options: 2MB , 4MB and 8MB (default).
Aperture Size	Select the Aperture Size. Note that above 4GB MMIO BIOS assignment is automatically enabled when selecting 2048MB aperture. To use this feature, please disable CSM support. ► Options: 128MB , 256MB (default), 512MB , 1024MB and 2048MB
DVMT Pre-Allocated	Select the DVMT 5.0 Pre-allocated (Fixed) Graphic Memory size used by the Internal Graphic Device. ► Options: 32M is the default.
DVMT total Gfx Mem	Select the DVMT 5.0 Total Graphic Memory size used by the Internal Graphic Device. ► Options: 256MB (default), 128MB and Max.

4.3.2 PCI Express Configuration

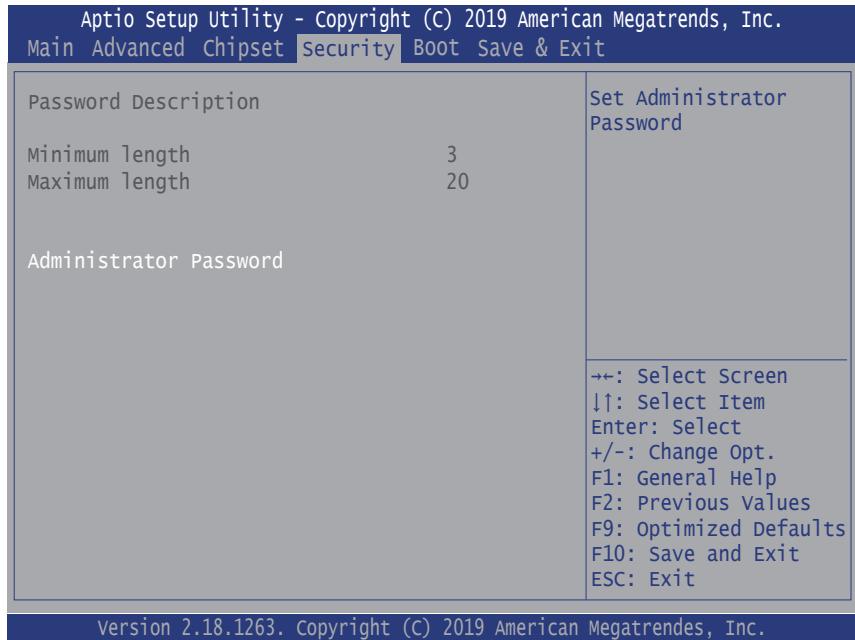

Setting	Description
PCIE1/2/3 & MC1/2	Enable (default) or disable PCIE1/2/3 and MC1/2.
ASPM Support	Disable or set the ASPM level. Force L0s will force all links to L0s state. "Auto" will allow BIOS to auto configure."Disable" will disable ASPM. ▶ Options: Disabled (default), L0s , L1 , L0sL1 and Auto .
PCIe Speed	Select PCI Express port speed. ▶ Options: Auto (default), Gen1 , Gen2 and Gen3

4.3.3 SATA and RST Configuration

Setting	Description
SATA Controller(s)	Enable (default) or disable SATA Device.
SATA Mode Selection	Determines how SATA controller(s) operate. ▶ Options: AHCI (default) and RAID
SATA Controller Speed	Indicates the maximum speed the SATA controller can support. ▶ Options: Default (default), Gen1 , Gen2 and Gen3
Port 0/1/2/3	Enable or disable (default) SATA Port.

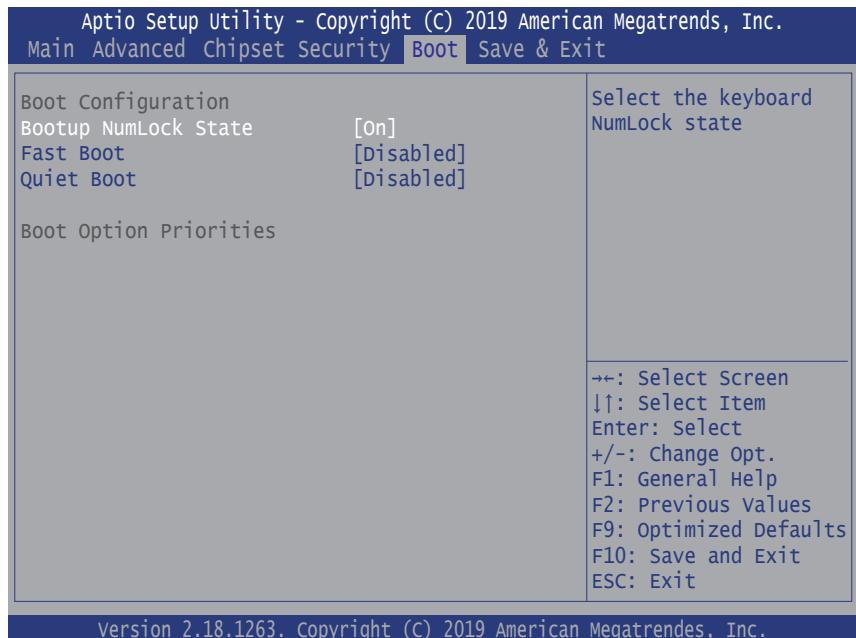

4.4 Security

The **Security** menu sets up the administrator password.

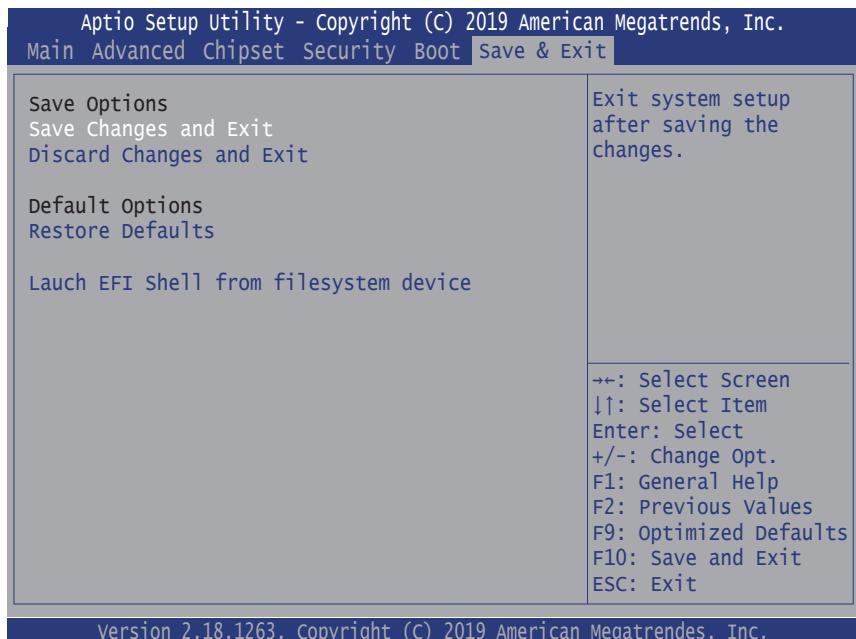

Setting	Description
Administrator Password	To set up an administrator password: 1. Select Administrator Password . The screen then pops up an Create New Password dialog. 2. Enter your desired password that is no less than 3 characters and no more than 20 characters. 3. Hit [Enter] key to submit.

4.5 Boot

Setting	Description
Boot NumLock State	Select the keyboard NumLock state. ► Options: On (default) and Off .
Fast Boot	Enable or Disable (default) boot with initialization of a minimal set of devices required to launch active boot option. Has no effect for BBS boot options.
Quiet Boot	Enable or Disable (default) Quiet Boot option.

4.6 Save & Exit

Setting	Description
Save Changes and Exit	Exit system setup after saving the changes. ► Enter the item and then a dialog box pops up: Save configuration and exit? (Yes/ No)
Discard Changes and Exit	Exit system setup without saving the changes. ► Enter the item and then a dialog box pops up: Quit without saving? (Yes/ No)
Restore Defaults	Restore/Load Default values for all the setup options. ► Enter the item and then a dialog box pops up: Load Optimized Defaults? (Yes/ No)
Launch EFI Shell from filesystem device	Attempts to launch EFI shell application (Shell.efi) from one of the available filesystem devices.

This page is intentionally left blank.

Appendix

Appendix A: I/O Port Address Map

Each peripheral device in the system is assigned a set of I/O port addresses which also becomes the identity of the device. The following table lists the I/O port addresses used.

Address	Device Description
03F8-03FF	Communications Port (COM1)
02F8-02FF	Communications Port (COM2)
03E8-03EF	Communications Port (COM3)
02E8-02EF	Communications Port (COM4)
002E-002F	Motherboard resources
004E-004F	Motherboard resources
0061-0061	Motherboard resources
0070-0071	Motherboard resources
0080-0080	Motherboard resources
0092-0092	Motherboard resources
00B2-00B3	Motherboard resources
1800-18FE	Motherboard resources
0A00-0A1F	Motherboard resources
0A20-0A2F	Motherboard resources
0A30-0A3F	Motherboard resources
0CF8-0CFF	PCI Express Configuration Access Port
0378-037F	Printer Port (LPT1)
0020-0021	Programmable interrupt controller
00A0-00A1	Programmable interrupt controller
04D0-04D1	Programmable interrupt controller
F040-F05F	SM Bus Controller
F090-F097	Standard SATA AHCI Controller
F080-F083	Standard SATA AHCI Controller
F060-F07F	Standard SATA AHCI Controller
0040-0043	System timer

Appendix B: BIOS Memory Mapping

Address	Device Description
0xDF000000-0xDF01FFFF	Ethernet Controller
0xDF040000-0xDF043FFF	High Definition Audio Controller
0xDF020000-0xDF02FFFFFF	High Definition Audio Controller
0xFED00000-0xFED003FF	High Precision Event Timer
0xFF000000-0xFFFFFFFF	Intel(R) 82802 Firmware Hub Device
0xDF030000-0xDF03FFFF	Intel(R) USB 3.0 eXtensible Host Controller - 0100 (Microsoft)
0xA0000-0xBFFFF	Microsoft Basic Display Adapter
0xDE000000-0xDEFFFFFF	Microsoft Basic Display Adapter
0xC0000000-0xCFFFFFFF	Microsoft Basic Display Adapter
0xFED10000-0xFED17FFF	Motherboard resources
0xFED18000-0xFED18FFF	Motherboard resources
0xFED19000-0xFED19FFF	Motherboard resources
0xE0000000-0xEFFFFFFF	Motherboard resources
0xFED20000-0xFED3FFFF	Motherboard resources
0xFED90000-0xFED93FFF	Motherboard resources
0xFED45000-0xFED8FFFF	Motherboard resources
0xFF000000-0xFFFFFFFF	Motherboard resources
0xFEE00000-0xFEEFFFFFF	Motherboard resources
0xDFFE0000-0xFFFFFFFF	Motherboard resources
0xFE029000-0xFE029FFF	Motherboard resources
0xFE028000-0xFE028FFF	Motherboard resources
0xFDAF0000-0xFDAFFFFFF	Motherboard resources
0xFDAE0000-0xFDAEFFFF	Motherboard resources
0xFDAC0000-0xFDACFFFF	Motherboard resources
0xFD000000-0xFDABFFFF	Motherboard resources
0xFDAD0000-0xFDADFFFF	Motherboard resources
0xFDB00000-0xFDFFFFFF	Motherboard resources
0xFE000000-0xFE01FFFF	Motherboard resources

0xFE036000-0xFE03BFFF	Motherboard resources
0xFE03D000-0xFE3FFFFF	Motherboard resources
0xFE410000-0xFE7FFFFF	Motherboard resources
0xDF051000-0xDF051FFF	PCI Data Acquisition and Signal Processing Controller
0xFD000000-0xFDABFFFF	PCI Express Root Complex
0x90000000-0xFFFFFFFF	PCI Express Root Complex
0xDF044000-0xDF047FFF	PCI Memory Controller
0xDF04B000-0xDF04BFFF	SDA Standard Compliant SD Host Controller
0xDF04A000-0xDF04A0FF	SM Bus Controller
0xDF048000-0xDF049FFF	Standard SATA AHCI Controller
0xDF04E000-0xDF04E0FF	Standard SATA AHCI Controller
0xDF04D000-0xDF04D7FF	Standard SATA AHCI Controller
0xFED40000-0xFED40FFF	Trusted Platform Module 1.2

Appendix C: Interrupt Request Lines (IRQ)

Peripheral devices use interrupt request lines to notify CPU for the service required. The following table shows the IRQ used by the devices on board.

Level	Function
IRQ0	System timer
IRQ1	PS/2 Keyboard
IRQ3	Communications Port (COM2)
IRQ4	Communications Port (COM1)
IRQ5	SM Bus Controller
IRQ8	System CMOS/real time clock
IRQ10	Communications Port (COM4)
IRQ11	Communications Port (COM3)
IRQ12	PS/2 Mouse
IRQ16~IRQ23	PCIe Devices

Appendix D: Watchdog Timer (WDT) Setting

WDT is widely used for industry application to monitor the activity of CPU. Application software depends on its requirement to trigger WDT with adequate timer setting. Before WDT time out, the functional normal system will reload the WDT. The WDT never time out for a normal system. The WDT will not be reloaded by an abnormal system, then WDT will time out and reset the system automatically to avoid abnormal operation.

This board supports 255 levels watchdog timer by software programming I/O ports. Below are the source codes written in C, please take them as WDT application example.

```
#include <math.h>
#include <stdio.h>
#include <dos.h>

int WDTCount;

int main(void)
{
    unsigned char      iCount;

    printf("WDT Times ( 1 ~ 255 ) : ");
    scanf("%d", &iCount);
    printf("\n");

    WDT_Start(iCount);

    return 0;
}

void WDT_Start(int iCount)
{
    outportb(0x66, 0xBA);                                /* Enable Watch Dog */
    delay(1000);

    WDTCount = iCount;
    outportb(0x62, WDTCount);    /* Number is Watch Dog Down count number */
    delay(1000);

    outportb(0x62, 0x00);                                /* Minute is 1 count unit by minute */
    /* Minute is 0 count unit by second */

}

void WDT_Stop(void)
{
    outportb(0x66, 0xBB);                                /* Disable Watch Dog */
}

void WDT_Clear(void)
{
```

Appendix

```
outportb(0x66,0xBA);           /* Enable Watch Dog */
delay(1000);

outportb(0x62, WDTCount);      /* Number is Watch Dog Down count number */
delay(1000);

outportb(0x62, 0x00);          /* Minute is 1 count unit by minute */
/* Minute is 0 count unit by second */
}

}
```

Appendix E: DIO Sample Code

```
#include "math.h"
#include "stdio.h"
#include "dos.h"

int SMB_PORT_AD    = 0xF040;
int SMB_DEVICE_ADD = 0x42;

void GPIOMode(int iMode);
void GPIOData(int iData);
int GPIOStatus();

int main(void)
{
    int iInput;

    GPIOMode(0xF);
    delay(2000);

    GPIOData(0x0A);
    delay(2000);
    iInput = GPIOStatus();
    printf(" Data : %2x \n",iInput);

    GPIOData(0x05);
    delay(2000);
    iInput = GPIOStatus();
    printf(" Data : %2x \n",iInput);

    return 0;
}

void GPIOMode(int iMode)
{
    SMB_Byte_WRITE(SMB_PORT_AD,SMB_DEVICE_ADD,0x03,iMode); /* DIO 0 ~ 7 Mode */
}

void GPIOData(int iData)
{
    SMB_Byte_WRITE(SMB_PORT_AD,SMB_DEVICE_ADD,0x01,iData); /* DIO 0 ~ 7 Data */
}

int GPIOStatus()
{
    int iStatus;

    iStatus = SMB_Byte_READ(SMB_PORT_AD,SMB_DEVICE_ADD,0x00);/* DIO 0 ~ 7 Status*/
    return iStatus;
}
```
